

**1 CGDK
COMBUSTION GAS LEAK DETECTOR KIT**

Expert Quality, block or combustion leak tester for determining if CO² is present in a vehicle's cooling system. CO² in the cooling system can indicate a head gasket leak, cracked block or a warped head, etc. Simple to operate by adding blue detector fluid to the tester and placing tester onto the radiator; air is drawn through the liquid which will change colour to yellow if CO² is present. Can be used in conjunction with a cone adaptor or an adaptor within the Draper Radiator Pressure Test Kit (Stock Nos. 14455 and 23420). Supplied with detector fluid. Display packed.

Stock No.	Part No.	Description
23257	CGDK	Leak Detector
23304	CGDK-RF	250ml C/Leak Fluid

**2 RPT33
RADIATOR AND CAP
PRESSURE TEST KIT (33 PIECE)**

Expert Quality, for pressure testing radiators of most popular vehicles. Will also pressure test radiator caps for leakage. 33 colour coded adaptors allow direct connection to radiator or expansion tank. Hand pump with gauge graduated with BAR and PSI allows simple and easy controlled pressurization via a quick coupling system. Pressure release pin allows system to be depressurized prior to detachment. Supplied in carrying case with display sleeve.

Stock No.	Description
23420	RPT33 Radiator and Cap Pressure Test Kit (33 Piece)

**3 RPT1
RADIATOR PRESSURE TEST KIT (20 PIECE)**

Expert Quality, for pressure testing radiators of most popular vehicles. 20 custom adaptors allow direct connection to radiator or expansion tank. Hand pump with gauge allows simple and easy controlled system pressurization via a quick coupling system. Pressure release pin allows system to be depressurized prior to detachment. Supplied in carrying case with display sleeve.

Stock No.	Description
14455	RPT1 Radiator Pressure Test Kit (20 Piece)

**4 CAV1
UNIVERSAL COOLING SYSTEM VACUUM PURGE AND REFILL KIT**

Expert Quality, dramatically reduces cooling system refill time by preventing airlocks thus avoiding time-consuming cooling system bleeding. Plugs into air line then attaches to the cooling system to create a vacuum. Filler hose is then connected allowing pre-mixed coolant to flow easily into the system. Supplied with gauge, 1.3M clear hose, four adaptors and hose end filler. Packed in carrying case.

Stock No.	Description
09544	CAV1 Universal Cooling System Vacuum Purge and Refill Kit
