

## Top Quality HVLP Professional Precision Spray Guns

HVLP (High Volume, Low Pressure) technology minimizes overspray and uses less paint. The professional refinisher's choice, these superb top of the range Blue Diamond spray guns, are precision engineered to produce well-atomized uniform spray patterns.

- ◆ Ergonomic designs provide comfort & balance leading to high-production performance.
- ◆ Light but tough aluminium & stainless steel build for durability & minimum maintenance.
- ◆ Stainless steel needles & fluid nozzles & precision brass air caps are durable & reliable.
- ◆ Choose from a selection of guns for different applications.

### 1 Professional HVLP Spray Gun - AP17

◆ Premium quality spray gun provides a superior finish whilst using less paint than conventional suction guns. ◆ High volume low pressure technology applies paint with less force reducing waste. ◆ Separate controls for varying spray pattern and paint volume.

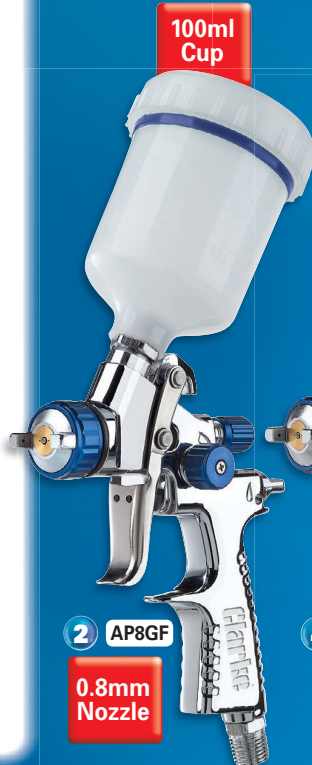

1.7mm Nozzle

1 Litre Cup

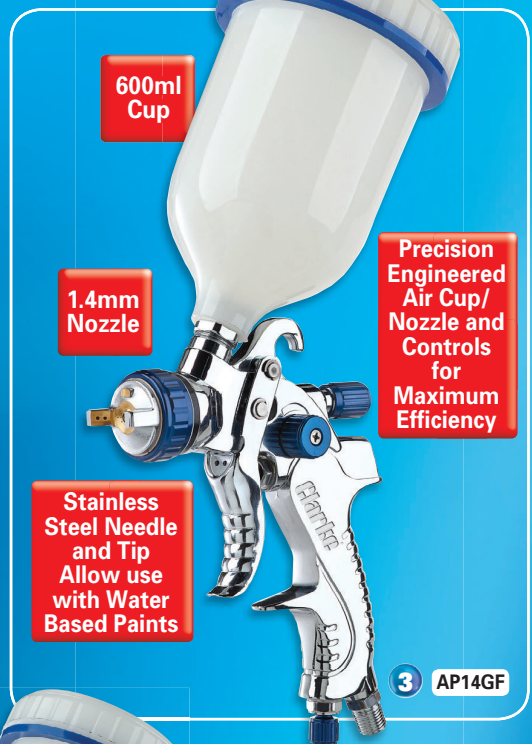

### 2 Professional Gravity Fed HVLP Mini Spray Gun - AP8GF

◆ This mini gun is designed to be used for smaller jobs where large volumes are not required. ◆ Gravity fed HVLP reduces overspray & provides increased efficiency over conventional suction guns. ◆ Separate controls for varying spray pattern & paint volume.

100ml Cup

0.8mm Nozzle

600ml Cup

1.4mm Nozzle

Stainless Steel Needle and Tip Allow use with Water Based Paints

Precision Engineered Air Cup/ Nozzle and Controls for Maximum Efficiency

3 AP14GF

### 3 Professional Gravity Fed HVLP Spray Gun - AP14GF

◆ Gravity feed allows high atomisation with lower air pressure & provides less overspray, less waste and greater control than conventionally fed guns. ◆ Separate controls for varying spray pattern & paint volume.

## Professional Gravity Fed LVMP Spray Guns

LVMP (Low Volume, Medium Pressure) technology provides increased paint transfer efficiency, improved working speed & higher viscosity paint performance than HVLP guns.

### 4 Professional Gravity Fed LVMP Mini Spray Gun - AP8GFM

◆ Designed for smaller jobs where lower volumes of material are required. ◆ Delivers fine atomisation & high transfer efficiency with less air consumption than conventional suction guns. ◆ Separate controls for varying spray pattern & paint volume.

100ml Cup

0.8mm Nozzle

### 5 Professional Gravity Fed LVMP Spray Gun - AP14GFM

◆ Provides the benefits of gravity fed guns with less air requirements than HVLP models. ◆ Separate controls for varying spray pattern & paint volume.

600ml Cup

1.4mm Nozzle

5 AP14GFM

2 & 4 Mini Guns - for Smaller Precision Jobs

Model	Description (all 1/4" BSP inlet)	Cup Cap.	Min. Compressor	Nozzle	Part No.
1 AP17	HVLP Spray Gun	1 Litre	3HP	1.7mm	3082100
2 AP8GF	Gravity Fed HVLP Gun - Mini	100ml	3HP	0.8mm	3082130
3 AP14GF	Gravity Fed HVLP Spray gun	600ml	3HP	1.4mm	3082120
4 AP8GFM	Gravity Fed LVMP Gun - Mini	100ml	3HP	0.8mm	3082110
5 AP14GFM	Gravity Fed LVMP Spray gun	600ml	3HP	1.4mm	3082125

All Spray Guns on this Page Require at Least a 3HP Air Compressor
